

## Super-M Extraction-Arm D.110 mm/1.5m•2m•3m•4 m. Made of Acidproof, Mirrorpolished Stainless Steel.

**Smoke, Dust and Gases.** An Extraction-Arm extracts smoke, dust and gases directly at source, before the contaminated air has been inhaled by somebody. You will get better working environment all over the premises. Less dust in the air will mean less wear and tear of the machines and lower cleaning costs.

**Toughest Working Environments.** Super-M is made for the toughest working environments in the Pharmaceutical-, Food Process- and Chemical Industry. Every detail is made of acid proof, mirror-polished stainless steel. Wall bracket, parallelogram arms, handle, hood, damper, bolts, nuts, washers – all of it!

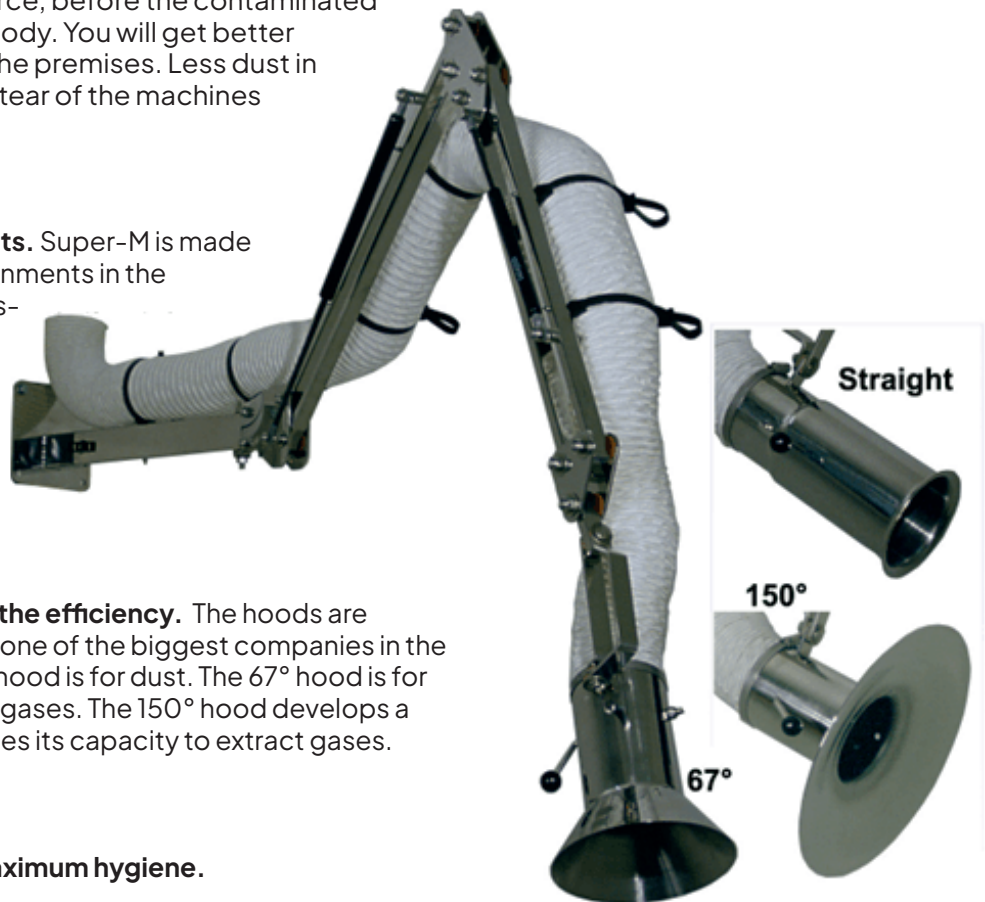

**The Hood is the Secret behind the efficiency.** The hoods are developed in cooperation with one of the biggest companies in the chemical industry. The straight hood is for dust. The 67° hood is for smoke and the 150° hood is for gases. The 150° hood develops a “tornado” effect, which enhances its capacity to extract gases.

**All Tube Ends are sealed for maximum hygiene.**

**The Super-M Arm can be sterilized in an Autoclave.**

**All Surfaces are mirror polished for easy disinfection with chemicals.**

**Perfectly balanced.** External hydraulically suspended parallelogram arms make the hood incredibly easy to move and 100 % stable in all positions

Wall Bracket, Parallelogram Arm, Hood and Handle of Mirror polished Acidproof Stainless Steel.	Art. nr.	Art. nr.	Art. nr.
	Rett hette	67° hette	150° hette
